Part 4: Short Talk Questions (3%)

Listen to the following paragraph and answer the questions.

Long flights can be stressful, but a few simple tips can make the journey more comfortable. To begin with, seat selection matters. Choosing the right seat depends on each traveler's needs and preferences. An aisle seat is ideal for those who want easy bathroom access and more freedom to move around. A window seat suits passengers who prefer a smoother ride with less turbulence and light sleepers who want better rest. Seats over the wings are generally the most stable. Travelers who want extra legroom can choose bulkhead or exit row seats, but these often lack underseat storage for personal items. Next, comfortable clothing is important for long flights. Passengers should wear loose layers such as T-shirts, soft pants, and light jackets. Supportive shoes and a versatile scarf can also help improve comfort throughout the flight. (Unit 2) #A
